Video:

Demonstration video hosted on youtube.com: <https://youtu.be/KewfizzdM9Q>

Member's contribution throughout semester:

Deployment:

https://github.com/ChristyNova/3308_project

From the github repository, in order to run Hipster Highway, download HipsterHighway.jar. Then navigate to the directory where you stored the .jar file and type "java -jar HipsterHighway.jar" into the command line. This will run the program.

AutoDoc:

Javadoc within Netbeans used to auto-generate documentation
